

PROTEIN QUALITY

With the rising desire for alternative protein sources, understanding their PDCAAS values is paramount.

Medallion Labs has created a new patented animal safe PDCAAS method referred to as the **ASAP Quality Score**.

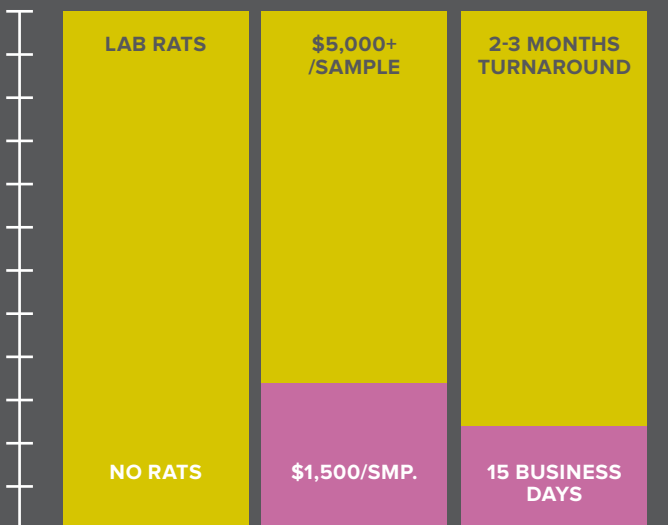

ASAP QUALITY SCORE

ANIMAL SAFE
No sacrificing rats

ACCURATE PROTEIN
Versus the current method

1. Animal Free
2. Inexpensive accurate results
3. Faster than the current method

- CURRENT METHOD
- ASAP QUALITY SCORE

Medallion Labs
FOOD FIRST. SCIENCE FOREMOST.

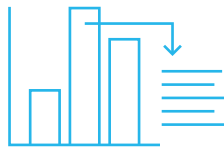

GREAT TOOL

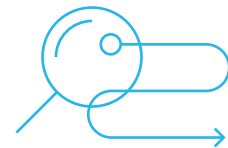

Helping scientists and developers:

**QUICKLY COMPARE
PROTEIN INGREDIENTS**

**ACCURATELY MEASURE
FINAL PRODUCT CLAIMS**

**UNDERSTAND
PROCESSING EFFECTS**

SAVE MILLIONS

Most companies over-fortify with protein in order to meet claims; the ASAP Quality Score would quickly and accurately tell you exactly how many ingredients you need and reduce your ingredient costs.

REVOLUTIONARY

Save the rats!

We've eliminated the need to use and sacrifice rats in a feeding study. This also reduces the cost and turnaround time, while maintaining great accuracy and correlation to in vivo results.

CUSTOM SOLUTIONS FROM EXPERT SCIENTISTS

For more than 40 years, Medallion Labs has partnered with brands like yours to bring food people love to tables across the nation. We use a deep understanding of analytical food and nutritional testing to design a custom approach that fits your needs, so you can confidently take your product to market.
